Forecast for Sunday 27 Jun 2021

Weather: A predominantly clear start to the day, though the risk of some scattered cloud around dawn. Remaining clear through the morning, with long sunny periods. Cloud begins to develop from midday, becoming most widespread in eastern areas during the late afternoon. This cloud then breaks up somewhat in the evening, allowing some clearer spells into the night.

Chance of cloud free mountain/hill tops above 800m: 80% in the morning, this dropping in the afternoon to 40% for eastern areas and 60% in the west.

Visibility: Cloud bases in the afternoon falling to 800-1000m, thus poor visibility possible on highest summits and eastern slopes. Otherwise, visibility remaining good at lower levels.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels will be high and some of this will still pass through the clouds that develop in the afternoon. Therefore, skin protection such as sun cream is advised if out for long periods.

Forecast for Monday 28 Jun 2021

Weather: A dry start to Monday, but a band of cloud and rain will then move across the park around mid-morning. The rain will quickly weaken, turning patchy for the rest of the morning and fading through the afternoon. The low cloud associated with this band will lift through the afternoon, but it will remain largely cloudy through the evening and into the night.

Maximum wind: Winds on the summit initially northeasterly 20mph, gusting 30 mph. Easing through the afternoon to 10 mph, gusting 20 mph.

Chance of cloud free mountain/hill tops above 800m: 80% to begin with, falling to 30% from mid-morning through to late afternoon. Rising to 60% thereafter.

Visibility: Cloud bases associated with the band of rain dropping to 300-400m, thus poor visibility on summits and higher slopes, particularly in any patches of drizzle or light rain. Good visibility before the cloud develops and after it lifts.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 18 Celsius.
At 800m: Plus 10 Celsius.
Freezing level: Above the summits all day.
